Inspired by the need for tranquility

the vitality of sustainability, and the provision of luxury!

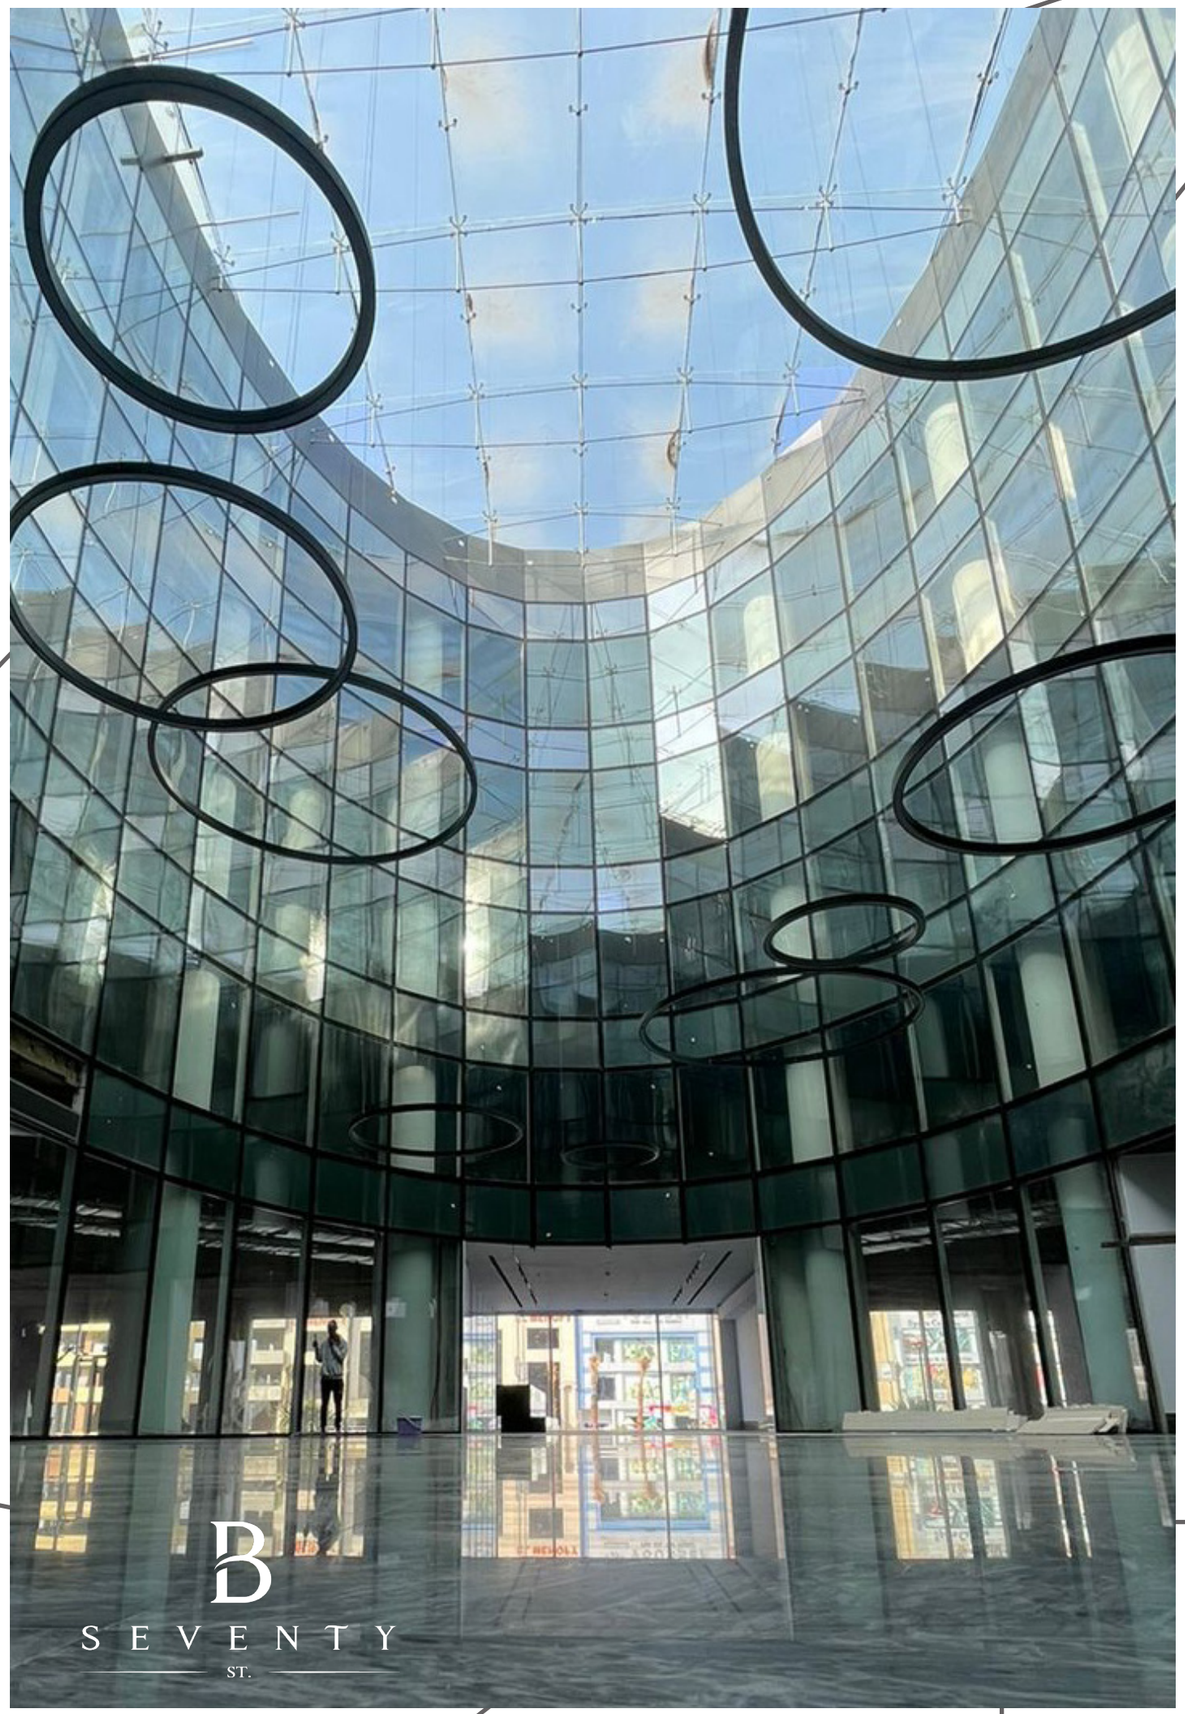

This project was designed in a significant attention to details that revolves around the serenity needed within a workspace to drive productivity and motivate efficiency. The geometrically structured squared body of the building, it was vital to add rounded curves on the inside projected through the exquisite selection of latest technology of lighting fixtures to reduce the sense of formality and introduce a warmer feel and aura.

An astounding feature was then added to the design to portray the distinctive design of this complex, which is the skylight amidst the complex that transmits direct sunlight through all of the building's offices and areas creating a vibrant environment that supports the wellbeing of all the employees and accentuates the fecundity within the workspace.

Complimenting the building with an extra feature, the outdoor area including a waterfall and fountains successfully achieves the purpose and philosophy of the design by adding a sustainable and environmental essence while also providing the tranquility needed in a professional setting.

Mixing between a variety of key facilities that guarantee the excellent of a business complex on both indoor and outdoor aspects, supported by the smart solutions that meets the building's needs efficiently.
